

*Doug Malcolm*

Doug has spent much of his working life running his own businesses or partnering with others with an urge to create worthwhile business. He is taking the lead with Environment & Health Technologies as the designer of the EHT primary technology to oversee its development, deployment and final use.

He is a member of the Health Informatics Society of Australia, the Australian Information Industry Association, the Alternative Technology Association and the Australian PV Institute.

He has previously been a member of the TGA Dental Industry Committee, the Mortgage Industry Association, the Australian Charter Vessel Association (Board member) and the Sydney Convention and Visitors Bureau.

He has been a partner in a number of successful businesses and has managed a number of other businesses within hospitality (inc. holding a NSW Liquor License for 10 yrs) in his early working life; financial services as Sales Management / Director (inc. developing his 1st software application using Delphi RAD technology); Print Manufacturing software as Director / Marketing & Sales Management / System Design (Magic & .Net RAD technology) and more recently the healthcare industry as Sales Manager / Product Manager / Marketing Manager in healthcare consumables and leading Australian software firm.

Doug is committed to developing new technologies to help our populations minimise their impact on global warming, to help governments improve their eHealth systems and to help modernise our cities to improve sustainability, healthcare and human interaction and compassion.

Doug is also committed to doing what he can to help fight human trafficking and slavery in our region and globally.

He was married for 17 years before divorce and has two adult children who he maintains a strong relationship with. His other interests include surfing, bushwalking, cooking, music, theatre and reading.
